FOREWORD

An explanation of the characteristics and functional purposes of the various forms of elemental beings are to be found in this booklet. The student is shown how to restore a friendly and harmonious relationship with them.

Of particular importance are the decrees suggested to be given individually or at group meetings. By giving these invocations, the Ascended Masters may utilize such energies, voluntarily directed to the higher realms, and increase and multiply them to transmute the causes set up by the discordant use of energy by mankind. The student is given a most valuable tool to prevent, or at least mitigate and lessen, the effect of predicted earthquakes, volcanic eruptions, hurricanes and tornadoes.

The original words contained in this booklet were prepared under the general direction of the Beloved Ascended Master El Morya in 1960. They were channeled through the beloved messenger, Geraldine Innocente. We are grateful, indeed, to be able to reprint this work.

Ascended Master Teaching Foundation

INTRODUCTION

THE knowledge and control of the Four Elements and their inhabitants is part of the training of the chela. He should know the good uses to which these Elements and their inhabitants (Elementals) can be put to, and also the distortion of their expression through the wrong qualification of mankind.

The Fire element is the most important of the four as it is an expression of the Sacred Fire, from which the Violet Flame and all other Flames proceed. One of its constructive activities in the physical plane is that of purification through the incineration of rubbish and the human bodies, which allow the elements to return to the Sun for repolarization. Its destructive activity is shown in the burning of human bodies, in buildings and woods also in thunderstorms and in the use of firearms, bombs, etc.

The Air element is also very important for the maintenance of life in the physical plane, as without air people cannot live for any length of time. By the conscious control of the breath you can not only harmonize your bodies, making them better Temples of the Living God, "I AM", but you can purify your surroundings. Its beneficent activity is seen in the warm and cool breezes wherever they are required. They are also the means of propelling boats and ships on oceans and rivers, as well as air-planes. We see its destructive activity in cyclones and thunderstorms.

The Water element is related to the emotional body and the purification of it results in the purification of this body. In the physical plane it is a great cleansing agent and one of the factors for the balancing of the weather conditions and the production of harvests. Its destructive activity shown in floods, droughts and wrecks at sea in which men and animals perish. That this element like all others can be controlled was manifested by the

Ascended Mason Jesus when He stilled the waters in the turbulent waters in the sea of Galilee.

The Earth element is vital for the production of food so that mankind can build perfect bodies, which are the outposts on Earth of the Spiritual and Cosmic activities. We see its benevolent action in the beautiful landscapes, in the bird life, in the flowers, in the beautiful minerals and of course, in the production of harvests. Its destructive action is shown in the landslides, volcanos and earthquakes.

The daily purification of the Elements and the cultivation of the friendship of the Elementals, as a prerequisite for their control and conscious cooperation, is a daily requirement of the chela, hence the importance of the wise selection of the Words of the Ascended Masters and Cosmic Beings, and the corresponding decrees contained in these pages, meant for daily reading and application.

V. What the Ancients Knew about Elementals	23
---	----

P R E F A C E

By Beloved Claire, the Elohim of Purity

I bring the full gathered Cosmic Momentum of My Purity to you, to all mankind, and to the elements which have served mankind through the ages! Do you know the only discomfort in the world comes from lack of purity in one of the four lower bodies?

We are endeavoring to anchor now the purifying energy into the ELEMENTS which have served mankind. This will release these elements from the resentments and rebellions against their tormentors (undisciplined human beings). It will also open the outer mind to a greater realization of Truth and begin the restoration of the Divine Atmosphere in which there is no veil of maya hiding the glory of the Angels, the Ascended Ones and All Who are assisting the race.

If the mental body is not purified, it cannot receive the perfect design from the Godhead or the Masters, nor can it manifest the strength to hold that design against the dis-integrating forces of doubt, fear, ridicule and the many other negative qualities that always endeavor to destroy a constructive pattern. If the emotional body is not purified, the idea and pattern will be so tinged with selfishness and personal ambition that the beautiful design again loses much of its perfection and efficacy. If the etheric body is not purified, the failures of the past will neutralize and often destroy the form before it can be externalized as a blessing for all life.

I ask you to call for the LAW OF FORGIVENESS for all your misuse of life through the ages and to accept My Gift of Purity, so that you can see, know and BECOME an expression of your own individualized "I AM" Presence and a Holy Grail, receiving into your outer mind the Divine Ideas from that Presence which you can, through your purified creative centers of thought and feeling, externalize for your own blessing, for the expansion of this Activity, and for the benefaction of your fellowmen.

I. THE FIRE ELEMENT

Directors: Helios and Vesta. Inhabitants: Salamanders

BELOVED HELIOS SPEAKS:

"I AM" the authority for this Universe come in answer to your own hearts' magnetic pull of love, and with My Complement, beloved Vesta. We shall through the courtesy of your Forcefield direct that Will which is Ours for this Earth planet, to every cell and atom of the planet Itself, the elemental life substance imprisoned by the corrupt use of thought and feeling and the outer consciousness of mankind. As from Our Bodies' Light, Our Hearts' Love, Our Minds' Thought was this planet first designed, so do We claim It now to fulfill Its divine purpose in this universe, to become and remain a Star of Freedom, emitting that light which is of Its Parents, radiating that love which is of Its Parents, proceeding in grace according to the wisdom of Its Parents!

You are in fairly good control of the arms that belong to your body and you have a certain dexterity of the use of your fingers, and each one has certain important services to perform for yourselves and for others. You must come under such control of the light-rays passing from your bodies. It is not enough to be an unconscious radiating center, which would be like having a body with arms and hands with no directive intelligence within them. You must become in your training and advancement and progress toward God perfection, the conscious controlling activity of consciously created and directed Light Rays, which you can use as you use the fingers on your hands, regulating the length of those light rays; regulating the pressure of any one upon conditions that need assistance and healing. It is the direction of those mighty Light Rays consciously which can still the storm, which can part the core of the cyclone. It is those mighty light

rays consciously directed which can cause all manner of discord to cease at a moment's notice. **PRACTICE**, beloved ones, the use of the light rays! directing them, focusing them and then exerting a pressure of your feeling through them, wherever earth conditions at the moment require assistance to be given.

The externalization of your Tube of Light, the direction of the Light Rays from your heart to form your aura of Peace, of Harmony, of Purity, of Perfection and the cohesive power of Love to draw toward you the substance of this world, the Ascended Master Friends of Light and co-workers who with you, will continue to expand the glories of the Kingdom. If there is too much of the cohesive power and you draw through sympathy either substance or individuals to pour into the heart center of your world, the balance is lost and the harmony too; if there is too much of the outgoing force, the power of expulsion, and you drive both substance and friends away, you have not mastery and your road is a lonely one.

This is what I charge—**MY OWN SUBSTANCE OF ENERGY** into you! And hope in the Name of God that made us all, that the friends of Helios shall move with shining smiling faces through this Universe. And man can discern Our close association and proximity by your happiness in service, your buoyancy in living, your joy in loving God and man; for never was it known that there could be an unhappy Sun, and you are Sons and Daughters of Sun Gods!

DECREE FOR THE MIS-USE OF THE FIRE ELEMENT

"I AM" (3) the Ascended Masters Law of Forgiveness and Transmuting Flame of all mis-use of the Fire Element by me and all mankind through the ages: "I AM" the Ascended Masters Law of Forgiveness and Transmuting Flame of all **MY MIS-USE OF LIFE** through the ages in any way whatsoever, replacing it all by the Elohim of Purity's Substance of Purity.

Beloved ASTREA, The Femenine Complement
of the Elohim of Purity, SPEAKS:

The Sacred Fire renders two services—one manifesting as constructive form in any sphere, including the physical appearance world; the other manifesting as the power of etherealization of form at the completion of its usefulness.

The Salamanders are of tremendous help to the Directors of the Fire Kingdom. Many of these salamanders are as large as the Empire State Building, while many are as small as the head of an ordinary pin. They serve constantly under the direction of their Leaders to dissolve the impurities released through the destructive use of the creative centers (thoughts and feelings) of mankind and are a tremendous boon to the beings of the elements of earth, air and water.

I would particulary like you to acknowledge and bless these salamanders for their service through the ages, not only in this physical appearance world, but also in the inner spheres where disembodied lifestreams dwell between embodiments. Fire in a destructive way has caused the loss of homes, lives and property. Therefore, mankind have a fear (often buried in the etheric garment) of the action of Fire. We are endeavoring to remove the fear from the etheric consciousness of the peoples and replace that fear with a love of the purifying radiation and activities that are within the Sacred Fire. The removal of the cause, effect, record and memory of such fear shall take place and the Sacred Fire will be welcomed by all evolutions in the Earth, on the Earth, and in Its atmosphere as a Liberating Freeing Purifying Power. I so decree it!

Will you please stop right here and call for the removal of the cause and core of all fear of the Fire Element and then call

sincerely and deeply for forgiveness for any mis-use of the Fire Element by your lifestream and that of all mankind back into the beginning of time. As this is done, We shall be actively sublimating those errors of the past and present, and preventing the cause of errors of the future by mankind now embodied as well as those who are to take embodiment in the future.

I chose to cooperate with the Beloved Elohim of Purity—Beloved Claire, by creating, sustaining, expanding and using the Circle and Sword of Blue Flame in, through and around every inharmonious and discordant expression of life. I can not express all My gratitude to you for calling to Me and allowing Me such freedom to act in the emotional, mental, etheric and physical bodies of mankind. Thus the "wedges" of impurity that have lodged themselves around the electrons are being removed and the purifying Grace of My Beloved Claire is taking the place vacated by the discord.

* * *

DECREE TO ELIMINATE THE FEAR OF THE FIRE ELEMENT

BELOVED PRESENCE OF GOD "I AM" IN ME and BELOVED ASTREA, draw within Your Circle and Sword of Blue Flame the cause and core of all fear of fire, and TRANS-MUTE it into the illumination and understanding and use of the Sacred Fire. Cut every salamander free from every lifestream they have been bound to, whether the individual is in or out of embodiment at his time.

II. THE AIR ELEMENT

Directors: Thor and Aries. Inhabitants: Sylphs

BELOVED ARIES SPEAKS:

"I AM" Aries, the Spirit of the Air Element and the Director of the sylphs who serve so ceaselessly to keep the atmosphere of Earth purified enough for mankind to live upon its surface. If you could see the amount of poison exuded just through the breathing out of the polluted air from the physical bodies of mankind in one twenty-four hour period, you would realize with more emphasis and certainly with more gratitude the service of the sylphs who, twenty-four hours a day, utilize the powers of the Sacred Fire to keep mankind, imprisoned elemental life, and the four-footed creatures from poisoning themselves to the point of so-called death through their own exhalations!

It is a commonly known fact that mankind can live for as long as forty days without food, approximately twelve days without water, but only about THREE MINUTES without breath (excluding those initiates who have mastered the art of suspension of breath and who are rare in the extreme).

Within the Air are so many spiritual forces which the average man uses not at all. The average member of the human race responds only to the almost involuntary inhalation of breath as regulated by the Holy Christ Self and the body elemental. The short, hurried shallow breaths sustain life in the physical body but do little to spiritually vitalize and nourish it. We do call that mankind awaken again to the absolute necessity for developing the rhythmic breath, drawing deeply upon the spiritual energies in the atmosphere all about him, digesting the nourishment of that essence, expanding it, and then giving in turn a blessing to the atmosphere as he breathes out the breath from his body.

The simple exercises on the BREATH which were presented to the student body, were given with a PURPOSE! Upon the utilization of these exercises with the absolute certainty of resultant purification and energization of the lower bodies, depends a more intricate explanation of how man can use the breath to hasten his spiritual evolution! As in all spiritual practices, there are certain deeper aspects of the Law which cannot safely be practiced without the guidance and Presence of a trained Guru.

As in the other Kingdoms, in ages gone by, many individuals learned how to use the breath to sustain life in the body for long periods, to perform certain feats of magic, thereby gathering unto themselves great masses of credulous people. Becoming more bold, these individuals invoked certain of the sylphs to assist them in the creation of phenomena that awed the peoples. These sylphs, like the salamanders and undines, became attached to the individual who had so invoked them and followed such individuals through series of embodiments, becoming often the master of the individual rather than his servant. Bold "blustery" individuals usually have either the presence of such sylph or a momentum of such a sylph's power in the aura.

Let us pause while you make the call for the freedom of every lifestream belonging to this evolution from an inharmonious association with a sylph who has chosen, temporarily to use God's energy destructively. And let us call on the Law of Forgiveness for every member of these evolutions who has consciously or unconsciously used the Air Element or the sylphs for a selfish or destructive purpose, so that the cause, effect, record and memory of such unholy partnerships may be removed from the etheric realm and the Air Element return to Its natural benevolent service to this planet and Its people.

We are concerned with the purification of the etheric bodies of mankind so that there are no longer desires to bend the forces of the elements to human destructive free will. We are concerned with the purification of the rebellions and resentments that exist between the forces of nature and mankind. When the elementals

KNOW, through proven fact, that mankind seeks to COOPERATE WITH THEM. We shall see the re-establishment of that glorious Kingdom of Angels, mankind and the elemental life which will be externalized in Saint Germain's Golden Age of permanent perfection for the planet and its evolutions.

"I AM" REAL! I AM YOUR FRIEND! BELOVED THOR IS REAL! HE IS YOUR FRIEND! The sylphs are real—they want to be your friends and have, despite so much ingratitude upon the part of mankind, proven their willingness to serve by making and keeping the atmosphere of Earth pure enough to sustain life, human, and in the nature kingdoms.

When you hear or read of vortices of destructive nature attempting to manifest at any point on Earth's surface, CALL TO US! Ask for Our Assistance and see how quickly We will come to the aid of those for whom you call!

The Beloved Thor moves the great "air masses" to points where they are needed most, providing cooling breezes for those sweltering in humid heat, filling the sails of boats becalmed on tideless seas, directing the purifying energies of the Northwind that carries the beautiful gifts of the Elohim of Purity—snow—to blanket and nourish portions of Earth surface preparatory to a new harvest. Thor directs the precipitating clouds that carry the necessary moisture to arid areas on the East wind; He directs the soft warm breezes on the South wind and the moisture absorbing currents that etherealize excessive precipitation, dry up waters that are in the wrong place, return the rivers to their natural size. It is one of the tragedies of creation that Beloved Thor has been picturized as a great "bloated figure" directing destructive energies (through the wind) to beset already distraught mankind.

My service is to provide the Essence of Air! Like Neptune and Virgo, the ages have required that I lower the vibratory action of the electrons that make up the Air Element so that the lungs of man could absorb, utilize the benefit by It. Beloved Thor's activity is to MOVE that Air, in kindness and wisdom, under

God's direction wheresoever is necessary to give the greatest blessings to the Earth and Its evolutions.

You have not known, you have not touched even the very hem of the garment of the Power that is within your capacity to draw FROM THE AIR and the ethers, that nourishment, that spiritual stimulus, that eternal youth and beauty, that vitality and fire that awaits the magnetic pull of your free will and the expansion of its qualities through your flesh body! Few there are in the West that have drawn from the Air Element that substance of FIRE which is the ELIXIR for which mankind has sought through the ages to gain eternal youth and beauty, indestructible strength and energy, and to make of the flesh body a translucent form of Light!

In the Air you have everything required to sustain the human form, to vitalize it, to quicken the vibratory action of the electrons within it, and to redeem it. Experiment if you will, and I shall assist you in bringing rhythm which you once knew back into the etheric body, back into the emotional and mental bodies, for when you abide within the natural rhythm of your being, you can know no tension, no distress, disease or limitation of any kind. It is merely because through discord and inharmony you have broken the rhythm of your inner bodies and your flesh form, that you find yourself at present suffering under certain pressures which are weight upon you.

Lovely friends, BREATHE THE AIR DEEPLY; love, oh love the Spirit of the Air and know that Aries and Thor are with you to respond to your every call!

* * *

DECREE FOR THE SYLPHS AND THE MIS-USE OF THE AIR ELEMENT

BELOVED PRESENCE OF GOD "I AM" IN ME and all mankind, Beloved Ascended Master SAINT GERMAIN, BLAZE (3) Your Violet Transmuting Flame and free every sylph from the tendencies and desires to follow the destructive patterns set up by mankind; "I AM" (3) the Law of Forgiveness and Trans-

muting Flame of every member of this evolution who has consciously or unconsciously used the Air Element or the sylphs, for a selfish or destructive purpose; "I AM" (3) the Ascended Masters Law of Forgiveness and Transmuting Flame of all MIS-USE of the Air Element by me or any of mankind, in or out of embodiment.

DECREE FOR LACK OF BREATH

Beloved Maha Chohan, Thor and Aries please see to it that no human being, or animal individually and collectively (such as in mine disasters) ever lack the God-given capacity to breathe freely. We thank you.

BLESSING OF THE AIR ELEMENT

BELOVED PRESENCE OF GOD "I AM" IN ME and all mankind, Beloved ARIES and THOR, we love, bless and thank You. We bless the Northwinds, Southwinds, Eastwinds, Westwinds, and the sylphs of the air who are your messengers, asking that all destructive activities of the Air be transmuted by the Violet Transmuting Flame and that never again will the Air Element participate in cyclones, tornadoes, or any destructive activity. We thank you.

III. THE WATER ELEMENT

Directors: Neptune and Lunara. Inhabitants: Undines

BELOVED NEPTUNE SPEAKS:

LUNARA and I chose to respond to the call of Helios and Vesta and offer Our services in the creation of the planet Earth. Because of certain momentums and affinities, We were chosen to create and govern the Water Element which forms a cushion for the landed surface of the Earth as well as the greater part of your physical garments and your emotional bodies as well.

The vibratory action of substance required for the Water Element of the Earth at the time of creation was much more rapid than it is today. The waters of the beautiful oceans, lakes and rivers were crystalline, pure and iridescent. The waters literally "sang" and added to the music of the Earth's beautiful atmosphere. The Undines were happy to serve in such a beautiful element and truly all was peace in the Kingdom in which We served.

The peoples of the Earth loved the water and enjoyed its purifying and refreshing service, as well as sailed happily and joyously upon its surface. In turn, the undines and the electrons that made up the Water Element loved mankind and enjoyed serving them. Water is ordained by the God of All as a FRIEND to man! Is man such a friend to the Water Element? Ponder upon this!

Many atrocities have been performed by the mankind of the Earth using the Water Element to extinguish life, not only of human beings but of animals as well. Many lifestreams have participated in and were where ships were sunk and great number of people were affected. Those records are within the

etheric and emotional bodies of embodied mankind as well as the inner vehicles of many who are yet to embody. Fear of the Water Element is due to having suffered, or caused others to suffer, some excruciating experiences.

Will you pause here and call for the cosmic removal of all mass etheric records of distress caused by the mis-use of the Water Element by all mankind since the fall of man. Then please call for the Law of Forgiveness of every lifestream who consciously or unconsciously used the Water Element destructively. This includes many lifestreams who will yet have to embody upon the Earth.

The emotional body of mankind will find such relief from discomfort as students call upon the Law of Forgiveness for the mis-use of the Water Element. Bless it consciously and accept the offer of its cooperation now in establishing Saint Germain's permanent Golden Age upon this Earth. The Water Element in your physical bodies will also be purified and much of the distress of the physical vehicles will be removed. We are ready and willing and but await your call to assist you.

MAKE FRIENDS WITH THE WATER ELEMENT IN YOUR ENVIRONMENT! BLESS IT! See how the undines and the electrons within the substance of water respond to you! Jesus mastered the Water Element because He had first mastered his own emotional world.

The excessive droughts, the flash floods, the unequal distribution of the precipitation of water is due to mankind's abuse of the Water Element. **ALL THIS CAN BE REMEDIED BY YOUR COOPERATION.** Lunara and I have worked almost alone in this endeavor heretofore. Now I say to you, as Jesus once said, "Hitherto the Father worketh—now I and the Father work".

The Substance of water, cooperating with Virgo and the mighty Helios, has made possible your every harvest; and the gift of water within your body has given you the capacity to

FEEL! The individual WHO CANNOT FEEL DEEPLY has much yet to learn on the pathway toward God Freedom!

Do you know the pull of love that is required to bring the ebbing tide and leave again the sanded surface? The control of energy that is within that power of centripetal force—THAT POWER I offer to you; that power can be yours and where the flood tides roll; where the rivers rise; where the skies emit tremendous rains, you, too, in the power of Love and IN THE NAME OF NEPTUNE, with MYSELF by your side, may be Master of that Element!

Remember and accept My momentum and that of My Twin Flame into your worlds and PRACTICE IT! PRACTICE NOW in the day of Peace that your momentum and feeling of the control of the Water Element is one with Mine! If you cannot feel that control in yourself, I CHARGE AND CHARGE AND CHARGE My feeling as the Father of the Waters into your emotional bodies right now. ACCEPT it and KNOW with certainty that you, too, in EMERGENCY, connected with My Own Self are likewise vested with the Master control of this Element.

Now, beloved ones, remember as you think of the Water Element and as you have opportunity to concentrate on the control of the storms and the rains, I AM AS CLOSE TO YOU AS YOU WILL ALLOW! Remember ME and take the feeling of Purity and Freedom which "I AM"!

* * *

DECREES FOR THE MIS-USE OF THE WATER ELEMENT

BELOVED PRESENCE OF GOD "I AM" and BELOVED ASTREA, draw within Your Circle and Sword of Blue Flame every etheric record of distress caused by the mis-use of the Water Element by me and each and every one of mankind since the creation of human discord on our Earth. Blaze the Violet Fire of Freedom's love through it and TRANSMUTE it all into perfection and the Victory of the Divine Plan fulfilled. We thank You.

'I AM' (3) the Ascended Masters Law of Forgiveness and Transmuting Flame of all mis-use of the Water Element by me and every lifestream, in or out of embodiment, and all who ever consciously or unconsciously used the Water Element destructively. CUT EVERY UNDINE FREE (3) from every lifestream whether they are in embodiment or not and PURIFY (3) every undine from the desire to ever torment mankind again.

CALL TO THE WATER ELEMENT FOR PROTECTION

In the Name of the Presence of God which "I AM", I call to You BELOVED NEPTUNE, in emergency, STAND BY MY SIDE and direct Your mighty Power of Love through me to control the Water Element at my point on the Earth—see that the undines are my friends and we work together to serve the Light. I thank You.

BLESSING OF THE WATER ELEMENT

BELOVED PRESENCE OF GOD "I AM" IN ME and all mankind, BELOVED NEPTUNE AND LUNARA, we bless and bless and bless and thank You and all the beings of the Water Element, all the undines who have ever served us and all mankind, who are serving us now or ever will serve us. We bless the Water Element everywhere and the blessed undines who are Your messengers, asking that all destructive activities of the Water Element be transmuted by the Violet Transmuting Flame and that never again will the Water Element participate in hurricanes, typhoons, tidal waves or any destructive activity. We thank You.

IV. THE EARTH ELEMENT

Directors: Pelleur and Virgo. Inhabitants: Gnomes

BELOVED VIRGO SPEAKS:

I AM" VIRGO, Spirit of the Earth, called affectionately by many 'Mother Earth'! My Beloved Pelleur and I answered the summons of Helios and Vesta for volunteers to help the Great Elohim in Their task of creating a habitable planet for a mankind which would issue out of the Presence of Helios and Vesta in time!

The Beloved Pelleur offered His full gathered momentum of centripetal force to create the "law of gravity" which varied through the ages according to the weight and vibratory action of the peoples, and to create the magnetic pull which holds continents as well as islands in their perfect place. I offered to mould universal, intelligent life-substance into the design created by Helios and Vesta which rested in the bosom of the Silent Watcher.

I worked in close harmony with the First Maha Chohan, the Beings of each of the Four Seasons as well as the Great Beings Who ensouled the mountains and hills, the fertile valleys, the trees, shrubs and flowers and the little gnomes whose activity would be within the very body of the Earth Itself. When the first members of the human race embodied, the Earth was garlanded in Her most fragrant flowers, Amaryllis, Spirit of Spring, having prepared for over nine hundred years to develop the greatest beauty for the incoming holy innocents and their Guardians.

The Earth substance was crystalline, pure, iridescent and the glowing radiation from the very center of the Earth where Pelleur had focused His magnetic Ray of Pink Flame (the point where the masculine and feminine rays which formed the matrix around which the planet itself was created) was easily distinguishable pouring up in, through and around the Earth and all its attendant evolutions.

After the laggards came from other Stars, mankind's vibratory action began to lower, and his physical body became heavier and the excrements from the physical bodies began the creation of what is so aptly termed "soil". Then as in all the other Kingdoms, there began to build resentments and rebellions against the thoughtless, careless and selfish members of the human race who used the body of the Earth, the riches of its mountain ranges, the harvest of the selfless workers in the nature kingdom as a matter of course, giving back nothing but refuse and excrement in exchange for this freely given heritage of harvest, of precious stones and metals and the very platform provided for their feet, as well as upon which to build their homes, their temples and their places of pleasure and vanity.

The gnomes, like all beings of nature, are imitative in extreme. They mirror by their very vow of obedience to man, that which they see! Many of the lovely delicate ethereal gnomes became distorted in shape, mischievous in nature and enjoyed playing tricks upon their human tormentors. Worse still, some of the greater Mountain Spirits, catching up the spirit of rebellion, spewed forth fire, smoke, molten lava and caused great havoc, death and destruction to the human race. All volcanic action, past and present is due to such antipathy between the spirits of Earth and the peoples whom they had come in such love to serve.

Remember, beloved ones, the Earth has suffered much from mankind. The decaying bodies of her dead have been placed within the Earth and the gnomes have had the unpleasant task of completing the dissolution of polluted vehicles which had reached such a state of imperfection that the Holy Christ Self and body

elemental could no longer use it for any constructive purpose. Thank God, in the western hemisphere cremation is again coming to be recognized as an acceptable means of disposing of the worn earthly shell.

Let us call now on the Law of Forgiveness for all the mis-use of the Earth's gifts, all the tortures (conscious and unconscious) inflicted upon the gnomes and spirits of nature by all mankind, yourselves, all other embodied lifestreams and who are to embody on the Earth in the future. Let us also call on the Law of Forgiveness for all the havoc and disaster as well as mischief caused by the rebellions, resentments and hates of the beings of Earth toward mankind.

Let us ask that Beloved ASTREA lock Her Circle and Sword of Blue Flame in, through and around the cause and core of such FEARS and replace them by a loving trust and cooperation between the mankind of Earth and the Beings of Earth. Let Us ask that the desire and capacity to use the Earth, the riches of Her mountain deposits etc., for destructive purpose be dissolved and removed from all belonging to this evolution!

Your physical bodies are destined to outpicture the glory of your own individualized "I AM" Presence! I am here to help you to regain that perfection; and will you send your love to Beloved Pelleur for His service through the ages.

All of your bodies function like ovoids of matter of the various planes around your flesh form; the flesh form is the smallest within the center; the Etheric Body interpenetrating that, the Mental Body outside of that; you know that as the Light descends from the Electronic Presence through the silver cord, it passes through the emotional, mental, etheric and physical bodies and anchors within the heart. You must BECOME through the Flame within your heart, the dignified, balanced, poised Master of your emotional, mental, etheric and physical bodies. Your Holy Christ Self neither slumbers nor sleeps! Speak to It and ask that Holy Christ Self to regulate for you and put in their perfect place as instruments of the "I AM", your vehicles and no longer be servant but MASTER in your household!

DECREE REQUESTED BY BELOVED VIRGO

"I AM" (3) the Ascended Masters Law of Forgiveness and Transmuting Flame of all the mis-use of the Earth's gifts; all the tortures, consciously or unconsciously inflicted upon the gnomes and spirits of nature by myself and each and every one of mankind. BELOVED PRESENCE OF GOD "I AM" IN ME and all mankind and Beloved ASTREA, LOCK all havoc and disaster and mischief caused by the rebellions, resentments and hates of the beings of Earth toward mankind, in Your Cosmic Circle and Sword of Blue Flame and TRANSMUTE (3) it all into loving, trusting cooperation between the gnomes and mankind. Take out of all mankind the desire and capacity to use Earth, the riches of Her mountain deposits and all Her gifts for destructive purposes; dissolve and transmute it from all who belong to this evolution.

FREE (3) every nature spirit, the gnomes, sylphs, undines and salamanders from all destructive influences of mankind, and the spirits of the Earth from remembrance of such association and destructive directions and activities.

* * *

BLESSING OF THE EARTH ELEMENT

BELOVED PRESENCE OF GOD "I AM" IN ME and all mankind, BELOVED VIRGO AND PELLEUR, we love, bless and thank You. We bless all the gnomes and spirits of Earth who are Your messengers and every atom of the Earth on this planet, asking that all destructive activities of the Earth beings be transmuted by the Violet Transmuting Flame and that never again will the Earth Element participate in earthquakes or any destructive activity. We thank You.

APPENDIX

V. WHAT THE ANCIENTS KNEW ABOUT ELEMENTALS

ACCORDING to the Ancients, the following are the characteristics of the Elementals: They have bodies lighter than men, and have souls that can be raised to heaven stature by love.

Salamanders (Fire) They can become taller or smaller than men, as they choose. They have been seen as tongues of fire in the country and even in homes. They are supposed to have affinity with those born between March 21 and April 20; July 23 and August 23; and November 23 and December 21.

Sylphs (Air) They are bigger and stronger than human beings. Sometimes they are of a very kind disposition towards men and can go near them and enter into their service. They are supposed to have affinity with those born between May 22 and June 21; September 23 and October 22; and January 21 and February 19.

Undines (Water) They are like human beings. Occasionally they get out of the water and can be seen sitting on the shores or banks near where they live. They are supposed to have affinity with those born between June 22 and July 22; October 23 and November 22 and February 20 and March 20. The sirens and mermaids are connected with the undines.

Gnomes (Earth) They live in a semi-material substance unknown to man. They are normally sixteen inches high. They appear also as dwarfs but they can stretch their forms even to appear as giants, as the Snow Man of Himalaya. These are the antediluvian giants who lived on earth, which are mentioned in Genesis VI:4. If a man has a gnome as a servant he must be faithful to the gnome, as each one has to be obedient to the other. They are supposed to have affinity with those born between April 21 and May 20; August 24 and September 22; and between December 22 and January 20.
